PXR reporter dose-response of pure compounds (OPA_PXR-032 + OPA_PXR-036): 4PL fits for 10 compounds

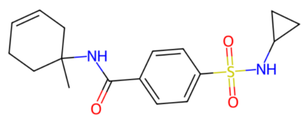

Mean ± SD of 2 runs (n = 2) · Excluded from fit (signal rollover) · 4PL fit (all wells of both runs) · Fitted EC_{50}

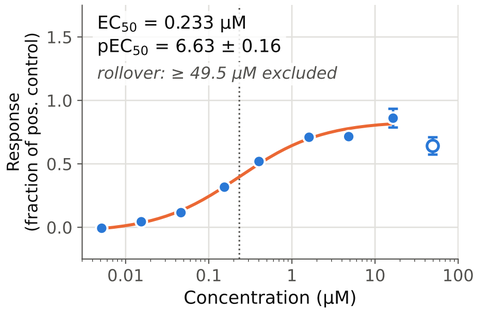

OCNT-2309356

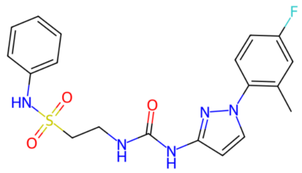

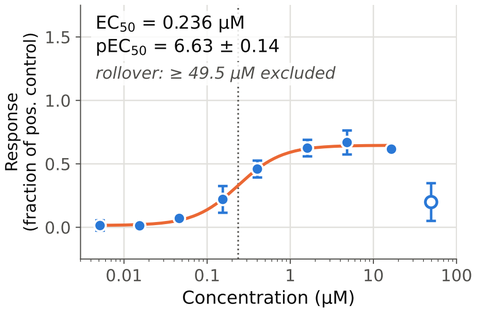

OCNT-2315472

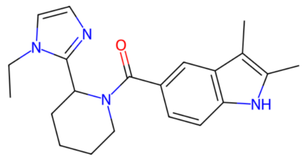

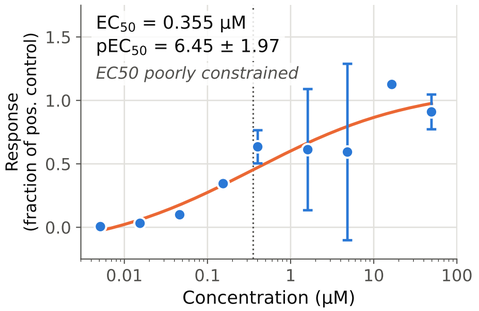

OCNT-2318616

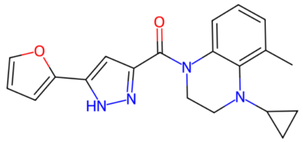

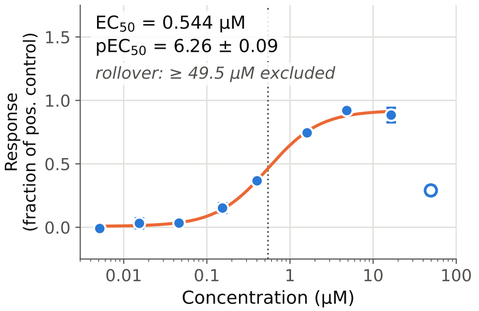

OCNT-2317134

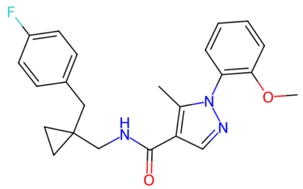

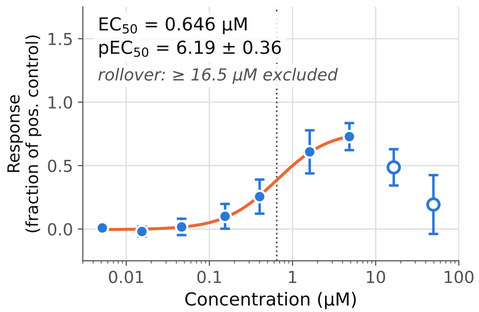

OCNT-2316441

OCNT-2315950

$pEC_{50} = -\log_{10}(EC_{50} / M)$; ± in the annotation = 95% CI from the fit; error bars = SD of the two runs (n = 2, a rough estimate). Response = luciferase signal normalised to the positive control (dimensionless). Identical x- and y-limits in every panel.
